

SAMPSON BOATENG

Data Analyst | (207) 332-5395 | samboateng190@gmail.com | boatengs.github.io/my-portfolio | linkedin.com/in/sam-boateng

PROFESSIONAL SUMMARY

Data analyst with an M.S. in Applied Machine Intelligence and a B.S. in Computer Science, experienced in converting financial, donor, healthcare, and operational data into accurate analysis and actionable insight. Proficient in SQL, Excel, Python, Tableau, and Power BI, with hands-on expertise in data cleaning, reconciliation, exploratory analysis, visualization, forecasting, dashboard development, and statistical modeling. Trusted to communicate findings to technical and non-technical stakeholders, strengthen data-quality practices, and manage analytical work from definition through delivery.

EDUCATION

Northeastern University, The Roux Institute Portland, ME	June 2025
Master of Science, Applied Machine Intelligence	
Saratov State University Saratov, Russia	June 2023
Bachelor of Science, Computer Science	

TECHNICAL SKILLS

Analytics & Visualization: SQL, Excel, Tableau, Power BI, Python (Pandas, NumPy), Matplotlib, Seaborn, Plotly
Statistical & Machine Learning: Regression, clustering, time-series forecasting, anomaly detection, hypothesis testing, classification
Databases & Big Data: SQL, Apache Spark, Hadoop, Hive
Software Tools: Git, Jira, Dataiku, Scikit-learn, PyTorch, Microsoft Office Suite, Bloomerang CRM, Zapier, Google Workspace Admin, Microsoft 365 Admin

WORK EXPERIENCE

Finance, Development & IT Administration Support Analyst Village Health Works New York, NY	Jun 2025 - Present
---	--------------------

Financial Analysis

- Analyze financial data in internal accounting systems, validate records, and monitor accuracy, consistency, and compliance.
- Perform budget-to-actual variance analysis, investigate discrepancies, and communicate material trends to decision-makers.
- Prepare reconciled datasets, management reports, and forecasts that support financial planning and executive decisions.
- Reconcile financial and donor information across systems using structured validation, normalization, and error-checking procedures.

Development Analytics

- Maintain donor databases and enforce consistent data-entry, normalization, documentation, and data-quality standards.
- Analyze giving and fundraising patterns to identify trends and inform outreach, stewardship, and revenue-development strategy.
- Create standardized documentation that improves institutional knowledge, reporting continuity, and forecasting readiness.

Data Systems & IT Support

- Support and troubleshoot data systems and network infrastructure to maintain reliable reporting and database access.
- Provision access and onboard employees to internal data systems, analytical tools, and shared technology workflows.

Student Ambassador

Northeastern University Portland, ME	2024 - 2025
---	-------------

- Represented the university at student-facing events, information sessions, campus activities, and community-engagement programs.
- Welcomed prospective and incoming students, answered questions, and shared clear information about academic programs, resources, and the student experience.
- Supported campus tours, orientations, and outreach initiatives by coordinating logistics and helping participants navigate university services.
- Collaborated with university staff and fellow ambassadors to promote inclusive engagement and deliver a professional experience for students and visitors.

Programmer Intern

Bosch Techno-Engineering Ltd Saratov, Russia	2021 - 2023
---	-------------

- Supported end-to-end software development and testing cycles by writing test cases, validating functionality, and documenting results.
- Diagnosed and resolved software defects through systematic debugging and performance tuning, improving system stability by 20%.
- Designed and developed an internal encryption and decryption testing tool to verify data integrity and strengthen security practices.
