

SAMPSON BOATENG

DATA ANALYST | APPLIED MACHINE LEARNING | DATA SYSTEMS

(207) 332-5395 | samboateng190@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

Cross-functional data analyst who turns fragmented financial, donor, healthcare, and operational data into reliable reporting and practical decisions. Combines analytics, applied machine learning, and systems thinking to improve data quality, clarify complex findings, and build workflows that people can actually use. Experienced across SQL, Excel, Python, Tableau, and Power BI, with a service-centered approach to stakeholder partnership and community impact.

CORE VALUE

DECISION SUPPORT

Reconciliation, variance analysis, forecasting, executive-ready reporting

DATA RELIABILITY

Validation, normalization, documentation, governance, quality controls

APPLIED ANALYTICS

Statistical modeling, machine learning, visualization, dashboards

PROFESSIONAL EXPERIENCE

Finance, Development & IT Administration Support Analyst

Jun 2025 - Present

Village Health Works | New York, NY

- Centralized the flow of internal communications across functions, creating a clearer shared channel for updates, coordination, and institutional knowledge while reducing fragmented information exchange.
- Analyze financial data, validate accounting records, and perform budget-to-actual variance analysis to identify discrepancies, surface material trends, and support management decisions.
- Prepare reconciled datasets, management reports, and forecasts that strengthen financial planning and provide leadership with decision-ready information.
- Reconcile financial and donor information across systems using structured validation, normalization, and error-checking procedures, improving confidence in reporting inputs.
- Maintain donor data and establish consistent data-entry, documentation, and quality standards that support fundraising analysis, stewardship, and forecasting readiness.
- Analyze giving patterns and fundraising activity to identify trends that inform outreach, donor engagement, and revenue-development strategy.
- Support data systems, access provisioning, network infrastructure, and employee onboarding to maintain reliable access to reporting tools and shared workflows.

Student Ambassador

2024 - 2025

Northeastern University, The Roux Institute | Portland, ME

- Represented the university across information sessions, campus programs, orientations, and community-engagement initiatives, translating institutional resources into clear guidance for prospective and incoming students.
- Partnered with staff and fellow ambassadors to coordinate welcoming, inclusive experiences and help students navigate academic programs, services, and campus life.

Programmer Intern

2021 - 2023

Bosch Techno-Engineering Ltd | Saratov, Russia

- Improved system stability by 20% through structured debugging, defect resolution, performance tuning, and validation across software development and testing cycles.
- Designed and developed an internal encryption and decryption testing tool to verify data integrity and reinforce security practices.
- Wrote test cases, validated functionality, and documented results to support reliable end-to-end software delivery.

TECHNICAL SKILLS & TOOLS

Analytics & Visualization: SQL, Excel, Tableau, Power BI, Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly

Statistical & Machine Learning: Regression, classification, clustering, time-series forecasting, anomaly detection, hypothesis testing, scikit-learn, PyTorch, XGBoost

Data Platforms & Systems: Apache Spark, Hadoop, Hive, Git, Jira, Dataiku, FastAPI, Gradio

Business & Administration: Bloomerang CRM, Adobe Analytics, Zapier, Microsoft Office, Microsoft 365 Admin, Google Workspace Admin

Emerging Focus: Applied machine learning, generative AI, NLP and LLM evaluation, healthcare analytics, fraud analytics, environmental and water analysis

EDUCATION

Master of Science, Applied Machine Intelligence

June 2025

Northeastern University, The Roux Institute | Portland, ME

Bachelor of Science, Computer Science

June 2023

Saratov State University | Saratov, Russia

RECOGNITION & LEADERSHIP

- Laurel and Scroll 100 honoree, recognized by Northeastern University for leadership, service, and meaningful contributions to the university community.
- Executive Member - Marketing and Roux Connections Coordinator; supported community building, engagement, communications, and inclusive programming.
- Event Organizer and Coordinator; helped build community with purpose through thoughtful programs, logistics, and participant engagement.
- First-place team, Climate Resiliency Hackathon; co-built the SeaLevel Rise App to make climate-risk information more accessible and actionable.
